-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/21/08 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 9-32, 34-35, 38, 41, 43-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boone et al (2002/0196141) in view of Kraus et al (WO 02/45566).

Boone et al, as discussed previously, discloses a device or carestation that is used to monitor a patient using both environmental and physiological sensors that are integrated such that the combination of both are displayed on a display. Boone et al discloses the claimed device except for specifically teaching that the sensed signals are processed to provide the user with a "recommended course of action" based upon such sensed signals. Kraus et al discloses a similar device, that senses various parameters and teaches (page 51, lines 3-12) that the outputs of one or more signals are provided

Art Unit: 3735

to the computer and display which can display diagnostic statements of different medical conditions as well as treatment recommendations. Therefore Kraus et al teaches that it is known to take such measurements and process them and determine a recommended treatment. Therefore a modification of Boone et al such that the sensed signals, both environmental and physiological, are processed and treatment recommendations or "a recommended course of action" is provided to the display would have been obvious to one skilled in the art in view of the teachings of Kraus et al which teaches that such an automated or computer generated recommended treatment or diagnosis is well known in the medical arts.

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The declaration filed 3/25/04 includes language stating "material to the examination ...in accordance with 37 CFR 1.56(a)", instead of material to the patentability ... in accordance with 37 CFR 1.56.

Applicant's arguments with respect to claims above have been considered but are moot in view of the new ground(s) of rejection.
